

Jadhav Rohit

NIT Silchar (ECE), 3rd Year

Full Stack Developer | ML | DevOps

Email: jadhavrohir@gmail.com

GitHub: github.com/rohitjadhav8849

LinkedIn: linkedin.com/in/rohit-jadhav | +91-8849719025

Summary

Full Stack Developer with hands-on experience building production-grade mobile apps, ML microservices, and cloud-native deployments on Kubernetes. Proficient in React Native, Node.js, Python, FastAPI, Docker, and Grafana monitoring. I learn while building — not the other way around.

Education

National Institute of Technology, Silchar

B.Tech in Electronics and Communication Engineering | CGPA: 7.78

Assam, India

2023 – 2027

Jawahar Navodaya Vidyalaya, Bharuch

Class XII – 87.4% | Class X – 81.8%

Gujarat, India

2020 – 2022

CSRL Super 30

Residential IIT-JEE Preparation Program

Delhi, India

2022 – 2023

Projects

(1)Open Source LLM on Kubernetes – End-to-End AI Deployment

[GitHub](#) ↗

Kubernetes | Docker | FastAPI | Ollama | Mistral 7B | Prometheus | Grafana

2026

- Deployed **Mistral 7B** via Ollama and exposed via **FastAPI backend** on a **Kubernetes cluster**.
- Set up **Prometheus + Grafana** monitoring stack; observed CPU spikes and pod health during inference.
- Built a **React chatbot UI** communicating with the K8s-managed backend.
- Debugged infra issues (pod networking, ImagePullBackOff) and documented fixes end-to-end.
- Conducted **comparative analysis of Mistral vs GPT-4** measuring cost, speed, and quality.

(2)SocietyPay – AI-Powered Society Management Platform

[GitHub](#) ↗

React Native | Node.js | MongoDB | Python | FastAPI | Scikit-learn

2025 – 2026

- Built full-stack **React Native** app with Node.js backend, MongoDB, and ML microservice.
- Implemented **secure auth** using JWT, role-based access control, and bcrypt hashing.
- Developed **NLP complaint classification** (Naive Bayes) and **payment risk models** (Scikit-learn).
- Integrated **Razorpay** with signature verification and built an **Anomaly Detection module** (Isolation Forest) for visitor security flagging every 10 minutes.

(3)Full Stack Airbnb Clone

Node.js | Express | MongoDB | EJS | Cloudinary | Render

2025

- Built platform with authentication, CRUD, and MVC architecture; integrated Cloudinary for uploads.

Technical Skills

- Languages:** C++, JavaScript, TypeScript, Python, HTML, CSS, SQL
- Mobile & Web:** React Native, React, Node.js, Express.js, FastAPI, EJS
- AI / ML:** Scikit-learn, Naive Bayes, Isolation Forest, NLP, Pandas, NumPy, Ollama, Mistral 7B
- DevOps & Cloud:** Docker, Kubernetes, Helm, Prometheus, Grafana, Render
- Security:** JWT, Bcrypt, API Rate Limiting, Razorpay Signature Verification
- Tools:** Git, GitHub, VS Code, Postman, Linux | **DSA:** 150+ problems on LeetCode

Positions of Responsibility

Illuminits Society, NIT Silchar

Technical Head

NIT Silchar

2024 – Present

NCC NIT Silchar

Company Sergeant Major (CSM)

NIT Silchar

2023 – 2026

Achievements

- Selected for **CSRL Super 30** – competitive IIT-JEE residential program
- Published technical blog on **Kubernetes + LLM deployment** (llm-deployment.hashnode.dev)
- SOF Bronze Medalist – District Level | Company Sergeant Major (CSM) at NCC NIT Silchar
